- Cloud-Native Application Development
- Generative AI Application Development

- 40% faster delivery
- 35% cost optimization
- 30% productivity improvement

DATAQ TECHNOLOGY

YOUR IT CONSULTANT

OUR SERVICES

We offer a range of consulting services designed to help organizations navigate digital transformation with clarity and confidence. Each service is tailored to your business goals, combining strategic insight with technical expertise to deliver measurable results.

Application Migration & Modernization

We modernize legacy systems by migrating them to secure cloud platforms. Our approach improves performance, scalability, and operational efficiency. Modern architectures reduce cost and enable long-term growth.

Micro Services Architecture

We design scalable micro services architectures for complex applications. This enables faster releases, system resilience, and flexibility. Ideal for businesses needing rapid innovation and scalability.

Cloud Application

We develop cloud-native applications optimized for scalability and reliability. Our solutions leverage leading cloud platforms for high availability. Cloud adoption enables faster deployment and cost efficiency.

Generative AI

We deliver AI-powered applications using Generative AI technologies. Our solutions automate processes and enhance decision making. GenAI drives innovation and improved customer experiences.

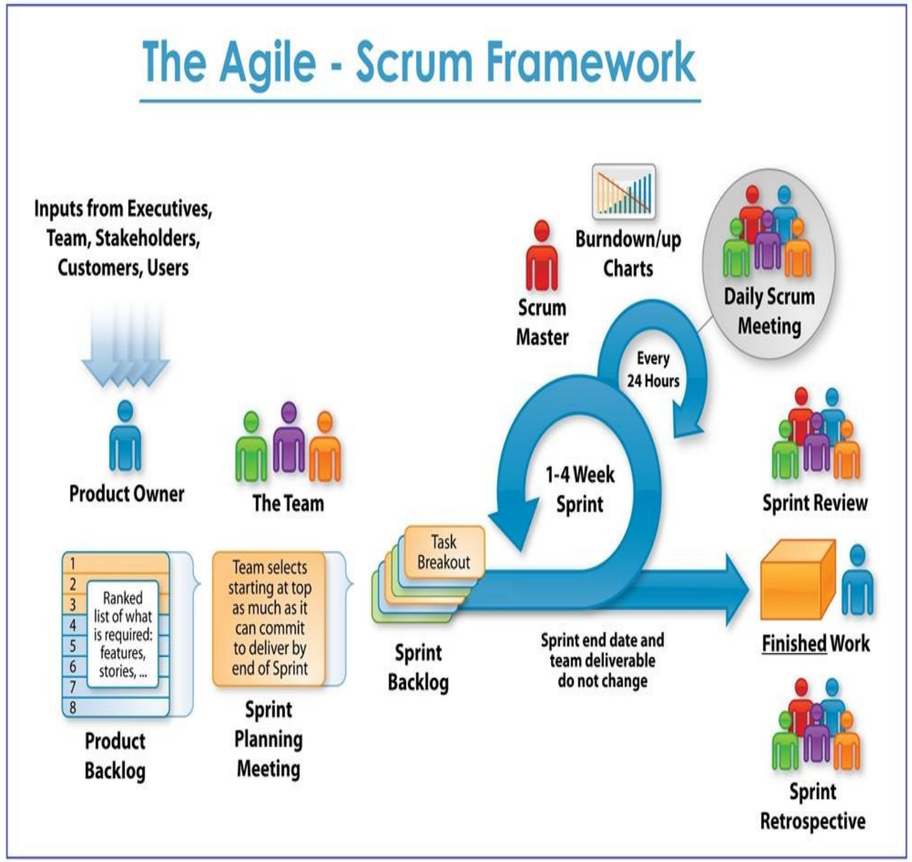
OUR PROCESS



Agile

We follow an Agile delivery model focused on flexibility, transparency, and continuous value delivery.
Development is executed in short, iterative cycles to accommodate changing business needs.
Continuous collaboration with stakeholders ensures alignment with business objectives.
Early and frequent releases reduce risk and improve overall solution quality.
Agile enables faster time-to-market and predictable delivery outcomes.

Scrum

Scrum is implemented with clearly defined roles including Product Owner, Scrum Master, and Development Team. Work is organized into time-boxed sprints with clearly prioritized backlogs.
Daily stand-ups provide visibility into progress, risks, and dependencies. Sprint reviews and demos ensure regular feedback and stakeholder alignment.
Retrospectives drive continuous improvement across people, process, and technology

DATAQ TECHNOLOGY
